Fund Overview

Fund	Real Estate Special Situation fund
Category	II
Fund Size	INR 50 Crore (Green shoe option for 50 crore)

Our Investment philosophy & Industry Viewpoint

THE FUTURE IS FUNDED, NOT OWNED:

How real estate fund of AIFs Outperform Traditional Real Estate

In today's volatile yet opportunity-rich real estate landscape, **wealthy investors and institutions are shifting away from direct property investments**-choosing instead to invest in professionally managed **Real Estate Funds under Alternative Investment Funds (AIFs)**. Why? Because AIFs don't just buy property-they **unlock hidden value, flip distress, and engineer structured growth**.

Here's how Real Estate AIFs are outperforming traditional property investments:

1. Flipping Distressed Assets for High Returns

India's financial ecosystem is flooded with **high-value distressed assets and NPAs**-prime real estate locked in litigation, under-utilization, or financial default.

AIFs with experienced teams and legal capabilities can **acquire these assets at significant discounts, resolve issues, redevelop or reposition them, and exit at far higher valuations**. This value-flipping strategy offers **double-digit IRRs** that traditional investors can rarely access or execute alone.

Investor Advantage: Participate in institutional-grade NPA resolution and profit from distress-to-value transformation.

2. Managed by Experts, Not mediators

Unlike buying a property and relying on brokers or hearsay, AIFs are managed by **seasoned investment professionals**, asset managers, and legal experts.

They employ institutional processes, financial modeling, legal due diligence, and **portfolio-level risk mitigation strategies**-ensuring your capital works smarter, not harder.

Investor Advantage: High confidence in governance, execution, and compliance critical for NRIs, UHNIs, and family offices.

3. Diversification Beyond a Single Property

Instead of concentrating capital in one property, AIFs invest across **multiple real estate projects, asset classes, and geographies**.

This significantly reduces risk while enhancing overall return potential.

Investor Advantage: Exposure to a diversified real estate portfolio with balanced risk and reward.

4. Structured, Predictable Returns

Many AIFs offer **structured payouts** combining fixed income and capital appreciation. Some follow a **priority waterfall model**, where investors get their capital and returns **before** the fund manager earns performance fees.

Investor Advantage: Predictability of income with upside potential-ideal for those seeking passive yet high-yield strategies.

5. No Operational Headaches

Direct real estate ownership involves documentation, maintenance, legal risks, tenant issues, and resale efforts.

With AIFs, investors avoid all operational burdens while still benefiting from **real estate-linked growth**.

Investor Advantage: Pure-play capital appreciation and income-zero involvement in property management.

6. Ideal for Global Investors and NRIs

Real estate AIFs are **regulated by SEBI**, offering transparency and investor protection. **For NRIs, UHNIs, family offices, and institutions**, this provides a compliant and tax-efficient route to participate in India's real estate market.

Investor Advantage: Regulatory security, simplified taxation, and repatriation support.

Structured Asset Owned your future

The old model of buying individual real estate assets is giving way to a smarter alternative: **professionally managed real estate funds**.

By **flipping distressed assets, using structured strategies**, and leveraging **deep market intelligence**, AIFs deliver **superior, risk-adjusted returns**-with zero operational stress.

Who can Invest?

- Individual Investor - Indian/ NRI/Foreigner
- High Net worth Individuals (HNI's)- Indian/ NRI/Foreigner
- Family Office - Indian/ NRI/Foreigner
- Foreign Venture capital
- Fund of Fund

- Taxation on distribution

Our Key team & enabling partners

Team members: Experienced professionals with a strong track record

Partners: Collaborations with leading financial institutions and service providers

Fee structure

Management fees:

2% of the AUM

Set-up fee:

Reimbursed at actual

Performance fee:

20% over & above
hurdle rate

CASE STUDY: PREVIOUS PROJECT

Description of Property: Commercial Land at Pondicherry

Our portfolio company successfully acquired 3.75 acres of strategically located commercial land, positioned adjacent to the upcoming Media City and directly behind the Mahindra Club House. This premium location offers high visibility and significant potential for commercial development, making it a valuable addition to our investment pipeline.

To enhance the asset's market readiness and credibility, approval from the Land Development Authority was promptly sought. This move not only strengthened the land's regulatory profile but also increased its overall value in the eyes of potential buyers.

Following this, the property was sold for ₹10 crores, compared to an acquisition cost of ₹6 crores, resulting in an impressive profit of ₹4 crores, marking a 66% return. This successful outcome reflects our portfolio company’s ability to identify high-potential opportunities, navigate approval processes effectively, and deliver strong returns through strategic asset management.

Location	Description	Acquisition cost (in crore)	Sale Price	Profit (in crore)	Profit in %
Pondicherry	Commercial land	₹6.00	₹10.00	₹4.00	66.00%

PROJECT ACQUISITION IN THE PIPELINE:

As part of our long-term growth strategy, **our portfolio companies have actively pursued large-scale land acquisitions across key regions in Southern India**, with a focus on locations demonstrating strong economic activity and infrastructure development. Currently, the portfolio includes **several partially acquired land parcels** collectively spanning approximately **490 acres**. These assets are at various stages of consolidation and form a crucial part of our active **development pipeline**.

The **total acquisition cost for these parcels stands at ₹93.97 crore**, and each site has been strategically selected based on its potential for **residential, commercial, or Industrial**, aligned with local demand patterns and regulatory frameworks.

These forward-looking acquisitions reflect our proactive approach to **land banking**, securing high-value assets in emerging corridors to unlock significant future value.

The portfolio comprises multiple assets acquired at a cumulative **purchase price of ₹92 crore**. Of this amount, **₹19 crore has already been disbursed**, while the remaining **₹73 crore is scheduled to be paid** in bullet tranches as per the respective agreements. Additionally, **₹4 crore** has been earmarked **for development-related expenditures**, bringing the total projected investment to **₹96 crore**.

Following recent market assessments, **the current market value of this asset stands at ₹164 crore**, resulting in an **unrealised profit of ₹71 crore**. Even if the asset is disposed of under forced sale, the profit realisation would be ₹50 crore approx. This significant appreciation underscores the strength of our acquisition strategy, our ability to identify undervalued opportunities, and our disciplined approach to value creation.

Asset under Acquisition:

Particulars	Details
No of Projects	9
Total Parcels (Partial Acquisition)	Multiple (Across Tamil Nadu)
Total Area (Approx.)	490 acres
Total Acquisition Cost	₹93.97 crore
Amount Paid	₹19 crore
Balance Payable	₹73 crore
Planned Development Cost	₹4 crore
Total Projected Cost	₹96 crore
Current Market Value	₹164 crore
Accumulated Profit	₹71 crore

Out of our nine ongoing projects, the two case studies shared above highlight the strategic focus and execution strength of our portfolio company. They reflect our ability to identify high-potential opportunities in both industrial and residential spaces, backed by strong planning and market insight to drive maximum returns.

Case Study-1

Our portfolio company is actively advancing large-scale development opportunities across both industrial and residential sectors. A key initiative underway is the proposed development of a **110-acre industrial land near Madurai**-a strategically located site poised to attract interest from manufacturing and logistics companies. The land disposal process is being facilitated through **CBRE**, a globally recognised real estate advisory firm, which is supporting investor engagement and outreach. Through CBRE's network, a **Dubai-based investor** has expressed interest in establishing a **solar power plant** within the industrial zone-an addition that aligns with sustainable development goals and enhances the long-term value of the site.

Location	Description	Acquisition cost (in crore)	Sale Price	Profit (in crore)	Profit in %
Land near Madurai	Industrial land	₹6.5	₹12	₹5.5	84.6%

Case Study-2

Simultaneously, an independent residential plotted development is being planned across **14 acres in Palur, Chennai Rural**, a location that lies within a rapidly emerging residential growth corridor. The project has been carefully conceptualised to align with urban expansion trends and the growing demand for quality residential infrastructure in the region. **The land has been acquired through bank auctions conducted by IDBI, ensuring a clean title and transparent acquisition process.**

The layout comprises **town planning–approved plots**, ensuring legal and regulatory clarity for prospective buyers. The site will be comprehensively developed with essential infrastructure, including clearly demarcated compound walls, well-laid internal roads, and installed electric poles, offering a plug-and-play ecosystem for residential construction.

Together with other ongoing initiatives, this project underscores a broader vision of enabling future-ready, high-quality real estate assets that are aligned with both market needs and urban planning principles.

Location	Description	Acquisition cost (in crore)	Sale Price	Profit (in crore)	Profit in %
Palur, Chennai rural	Residential land	₹11.00	₹20.00	₹9.00	81.82%
